ABOUT ME

Since I started my videogame career at the University Jaume I I am passionate about programming. During my course I realized that my true vocation was the development of software beyond the development of video games. I have spent a couple of years working as a researcher at the university, but I think it's time to join the working world and bring everything I've learned to a company that shares my values.

LANGUAGES

Spanish Native

Catalan: Native

English: B2

OF INTEREST

Vehicle ownership and driving license.

Geographical availability.

EXPERIENCE
