ABOUT ME

I am not just another advanced python programmer. I am a python programmer with a good foundation in programming thanks to my knowledge in other lower level programming languages like C++, C# and C that have given me that extra knowledge to understand how memory management works, pointers, references, static types and much more. In addition, my background as a game developer gives me very uncommon qualities in the industry such as gamification, user interaction, virtual and augmented reality as well as the handling of engines like Unity and Unreal Engine.

LANGUAGES

Spanish Native

Catalan: Native

English: B2

OF INTEREST

Vehicle ownership and driving license.

Geographical availability.

EXPERIENCE

Artificial Intelligence Researcher

December 2023 - August 2024

- Jaume I University, Castellón
- Pytorch

Artificial Intelligence Researcher

October 2022 - July 2023

- Jaume I University, Castellón
- Pygame
- Flask
- Unity

STUDIES

2019 -
2023

Career in Video Game Design and Development
Jaume I University

2023 -
2024

Master in Intelligent Systems
Jaume I University
Full English Course

SKILLS

Python Pytorch

Flask Django

SOFT SKILLS

Problem Solving

Communication

Team Collaboration

Adaptability
